Nature and Antiquities Philip L. Kohl,Irina Podgorny,Stefanie Gänger,2014-12-04 *Nature and Antiquities* examines the relation between the natural sciences, anthropology, and archaeology in the Americas in the nineteenth and early twentieth centuries. Taking the reader across the Americas from the Southern Cone to Canada, across the Andes, the Brazilian Amazon, Mesoamerica, and the United States, the book explores the early history of archaeology from a Pan-American perspective. The volume breaks new ground by entreating archaeologists to acknowledge the importance of ways of knowing that resulted from the study of nature in the history of archaeology. Some of the contributions to this volume trace the part conventions, practices, and concepts from natural history and the natural sciences played in the history and making of the discipline. Others set out to uncover, reassemble, or adjust our vision of collections that research historians of archaeology have disregarded or misrepresented—because their nineteenth-century makers would refuse to comply with today’s disciplinary borders and study natural specimens and antiquities in conjunction, under the rubric of the territorial, the curious or the universal. Other contributions trace the sociopolitical implications of studying nature in conjunction with “indigenous peoples” in the Americas—inquiring into what it meant and entailed to comprehend the inhabitants of the American continent in and through a state of nature.

Activist Biology Regina Horta Duarte,2016-11-15 *Activist Biology* is the story of a group of biologists at the National Museum in Rio de Janeiro who joined the drive to renew the Brazilian nation, claiming as their weapon the voice of their fledgling field. It offers a portrait of science as a creative and transformative pathway. This book will intrigue anyone fascinated by environmental history and Latin American political and social life in the 1920s and 1930s.

Drought in Brazil Erwin De Nys,Nathan Engle,Antônio Rocha Magalhães,2016-08-05 Drought is a slow-onset natural hazard that is often referred to as a creeping phenomenon. The challenge of monitoring drought's onset and evolution, and identifying its termination or end is one that scientists, natural resource managers, and decision makers have been struggling with for decades. However, drought management must be aimed at reducing the risks of future drought events on economies, the environment, and the social fabric of regions. As with many countries, droughts are often managed as a crisis in Brazil, rather than events for which officials and communities proactively prepare. Although droughts are not new to Brazil, the recent spate of droughts in the poverty stricken semi-arid Northeast and the industrial hub of São Paulo in the Southeast has forced the country to think more seriously about finally changing its drought policies and management approaches. The book is told through the perspectives of the ministers and secretaries, state policy and technical officials, civil society organizations, and development practitioners that helped to facilitate the shift in paradigm in Brazil from crisis management and towards proactive management of droughts. It is written in a style that is appealing to both technical and non-technical audiences, and aims to provide a framework and lessons for other countries to consider when embarking upon similar efforts to improve their own drought policy and management systems.

Borderlands and Frontiers in Africa Steven van Wolputte,2013 This volume addresses the marked influence that African borders and boundaries, whether real or imaginary, have on the lives of those inhabiting the borderland. How do political and symbolic borders take concrete shape, and how do they bear on daily life? Conversely, how does life in the borderland shape the borders that characterize it? The book recognizes borderlands as shifting places, times, or domains where competing discourses and regimes of power overlap. Characterized by overt contradiction and paradox, they are often imagined at the outside. Yet, they pertain to and define the center. The collected case studies challenge the assumption that states and anonymized institutions are the principal actors in border-making. Instead, they argue for an actor-oriented perspective, while drawing attention to the physicality of the borderscape. (Series: African Studies / Afrikanische Studien - Vol. 40)
